

CURRICULUM VITAE

of Irina Elkova Bineva

CONTACT INFORMATION

Address:

Institute of Solid State Physics “Acad. G. Nadjakov”,
Bulgarian Academy of Sciences
72 Tzarigradsko Chaussee Blvd
1784 Sofia, Bulgaria

Phone: +359 885 886 046

E-mail: irka@issp.bas.bg

ResearchGate:

https://www.researchgate.net/profile/Irina_Bineva

Scopus Author ID: 6701706013

CURRENT POSITION:

Institute of Solid State Physics “G. Nadjakov”, Bulgarian Academy of Sciences, Bulgaria -
Associated professor in Nanophysics division

EDUCATION:

2005, Ph.D. in Condensed Matter Physics

Institute of Solid State Physics “G. Nadjakov”, Bulgarian Academy of Sciences, Sofia,
Bulgaria

Thesis: **Silicon nanoparticles in thermal SiO_x thin films**

Supervisor: Assoc. Prof. Dr. Diana Nesheva

1997, MSc in Organic and Analytical Chemistry

Sofia University “St. Kl. Ohridsky”, Faculty of Chemistry.

Thesis: “Experimental and ab initio studies on the IR spectra and structure of trans -
benzylidenecyanoacetamide and of its potassium cyanide (¹⁴N and ¹⁵N) adducts”

Supervisor: Acad. I. Juchnovski

TRAINING

30.05 – 11.06.2010

NATO Advanced Study Institute “Nanotechnological Basis of
Advanced Sensors” - Sozopol, Bulgaria.

2009-2010

One year fellowship of World Federation of Scientists, WFS
Planetary emergency AIDS and infection diseases, Fight against
tumor diseases, for AFM and MFM investigations of bioferrofluids
for medical applications, advisor Prof. I. Nedkov, Institute of

	Electronics, BAS, 2009-2010.
01-13.07.2008	NATO Advanced Study Institute, Functional Properties of Nanostructured Materials, 01-13 June 2008, Sozopol, Bulgaria.
15.02.2006-14.02.2007.	Postdoctoral fellowship as Experienced researcher in Marie Curie RTN “Advanced Handling and Assembly in Microtechnology-ASSEMIC”
2006-2008	Scientists exchange in investigation projects between republic Bulgaria and Federal Republic Germany (DAAD Project) Д-01-78: Electrical and Optical Properties of Multilayers Structures, Containing Si Nanoparticles for Application in Electronics
08.2006r.	Course on Microrobotics, FSRM, Neuchatel, Switzerland
03-14.06.2005	NATO Advanced Study Institute, Functional Properties of Nanostructured Materials, Sozopol, Bulgaria.
25.06-5.07.2002	International School of Physics “Enrico Fermi”, course on “Electron and Photon confinement in Semiconductor Nanostructures”, Varenna, Italy.
10– 16.10.2000	Autumn School on Materials Science and Electron Microscopy 2000, Berlin, Electron Microscopy of Catalysts and Nanostructured Materials

PROFESSIONAL EXPERIENCE:

Institute of Solid State Physics “G. Nadjakov”, Bulgarian Academy of Sciences, Photoelectrical and optical phenomena in wide-gap semiconductors lab, Nanophysics division from 1997 until now

- Chemist – 1997, 2003-2005
- Assist. Prof. II degree – 2005-2007
- Assist. Prof. I degree – 2007-2012
- Associated Professor – 2012 -

IMT-Bucharest , Romania:

Experienced researcher in Marie Curie RTN “Advanced Handling and Assembly in Microtechnology-ASSEMIC” – 02.2006-02.2007; participation in WP2 (Task II.4. Micromanipulation for biological and medical applications), WP4 (Task III.3. Hybrid Microsystems and alternative approaches: Development of technologies for hybrid MOEMS. Development of optical interconnection for hybrid MEMS)

SCIENTIFIC ACTIVITIES

Scientific interests:

- Condensed matter physics, Material science and Nanotechnologies, SPM (Scanning Probe Microscopy), AFM (Atomic Force Microscopy),

- Material characterization, Structure, Morphology, Vibrational, Optical and Electrical Properties of Crystalline and Amorphous Semiconductors, Photoluminescence, Multidisciplinary research
- Crystals and Amorphous Semiconductors, Thin Films, Nanomaterials (Amorphous and Nanocrystals), Superlattices and multilayered structures, amorphous and crystalline nanoparticles in various matrices, Low Dimensional systems.

Skills:

Familiarity with the following instruments: SPM (AFM, EFM, SP, CAFM, MFM, Nanoidentation and nanolithography) Optical and IR transmission measurements, Electrical and Photoelectrical measurements, Photoluminescence, Electroluminescence, SEM, and so on. Skills in preparation and characterization of SiO_x and chalcogenide thin films, multilayer structures and nanocrystals in various thin film matrices; Knowledge in structural, vibrational, optical and electrical properties; Skills in thermal vacuum evaporation, knowledge in Sputtering and CVD techniques.

Patents: Bulgarian patent № 65971/09.09.2010. D. Nesheva, N. Nedev, E. Manolov, R.Brueggeman, S. Meier, Z. Levi, **I. Bineva** „Metal-Insulator-Silicon Structures, Containing Silicon Nanoparticles and Method for Their Fabrication”.

Number of publications – 58 (from them 3 are in book chapters and 44 are in international journals with Impact factor/Impact rank).

Independent Citations: 315, h-factor 8 (Scopus)

Conferences: 59

Anonymous referee for: Nanotechnology, Journal of Physics D: Applied Physics, Surface and Coatings Technology, Materials Science and Semiconductor Processing, J. Phys. Chem.C, Journal of Alloys and Compounds, Measurement Science and Technology.

PROJECTS

Cordinator of :

- Investigation of New Chalcogenide Materials with Scanning Probe Microscopy, DMU 03-91/12.12.2011, Young Scientists National Contest, BNSF, 2011
Status of the project: running, with first-stage report approved, funding pending
- Nanostructured and amorphous semiconductor films for sensors application, Projects funded under the Academy's bilateral agreements and in the framework of institute-to-institute cooperation – with National Institute for Research and Development in Microtechnologies – IMT Bucharest - 2013-2015, finished.
- Investigation of Surface Morphology of Nanostructured Thin Films with the Help of Scanning Probe Microscopy, Joint funding by the Bulgarian and Macedonian Academies of Sciences, 2014-2017, finished.
- Frequency-Assisted Thermal Evaporation in Vacuum – a Perspective Method for Altering the Topography of Thin Films
Project coordinator: Assist. Prof. PhD Temenuga Hristova-Vasileva, supervisor: Assoc. Prof. PhD Irina Bineva, Support for BAS Young Scientists Programme, 2016, finished
- Investigation of the Morphology and Structure of Nanostructured and Amorphous Semiconductor Films for Microelectronics and Sensors Application Projects funded under the Academy's bilateral agreements and in the framework of institute-to-institute cooperation – with National Institute for Research and Development in Microtechnologies – IMT Bucharest - 2016-2018.

6. Raman scattering and photoluminescence study of laser modified nanocrystalline ZnO thin films suitable for sensor applications, bilateral cooperation with Serbian Academy of Sciences, 2017-2019.

Participant in:

1. Bilateral cooperation between Bulgarian and Hungarian Academies of Sciences, project titled Structural and optical properties of new semiconductor materials and structures for advanced opto and nanoelectronics applications, 2016-2018, running.
2. Projects funded under the Academy's bilateral agreements and in the framework of institute-to-institute cooperation - with Institute of Physics, Belgrad, Serbia – Study of interaction of high-energy electrons with SiO_x and c(a)-Si-SiO_x thin films, 2014-2016, finished
3. Projects funded under the Academy's bilateral agreements and in the framework of institute-to-institute cooperation - with Institute of Physics, Belgrad, Serbia – Optical and Photoelectrical characterization of thin homogeneous and nanostructured films based on ZnSe, 2010-2012, finished.
4. World Federation of Scientists, WFS Planetary emergency AIDS and infection diseases, Fight against tumor diseases, -for AFM and MFM investigations of bioferrofluids for medical applications 2009-2010, finished.
5. NSF, No BM-1- Three –dimensional assemblies of semiconductor quantum dots : structure, optical, electrical and photoelectrical properties, joint project funded by NSF of Macedonia and Bulgaria, 2008-2010, finished.
6. National Innovation Fund at the Ministry of Economy and Energy, 02-54/2007 Nanostructured coatings – new biomaterials for bone implants obtained by a method of laser-liquid-solid interaction (nanobiocomposites), 2007-2010, finished.
7. Projects funded under the Academy's bilateral agreements and in the framework of institute-to-institute cooperation - with Institute of Physics, Belgrad, Serbia Nanostructures semiconductor thin films suitable for application as gas sensors, 2007-2009, finished.
8. Program for scientists exchange in investigation projects between republic Bulgaria and Federal Republic Germany (DAAD Project) Д-01-78: Electrical and Optical Properties of Multilayers Structures, Containing Si Nanoparticles for Application in Electronics 2006-2008.
9. European FP6 Project: Marie Curie Research Training Network “Advanced Handling and Assembly in Microtechnology-ASSEMIC” - Contract No: MRTN-CT-2003 504826 - 2006-2007 (www.assemic.net), finished.
10. National Science Fund Multilayer NNP-4-1 Structures and nanocomposite materials for applications in electronics. Modul 1: Multilayer structures containing silicon nanoparticles, suitable for fabrication of electronic memories and single electron devices, 2006-2010.
11. NSF F 1306 – Defect states in photoconductor with different dimensionality (01.2004-06.2007), finished.
12. Projects funded under the Academy's bilateral agreements and in the framework of institute-to-institute cooperation - with Institute of Physics, Belgrad, Serbia – “Raman scattering and photoluminescence of semiconductor quantum dots”, 2004-2006, finished.
13. The Royal Society: Joint Project UK – Bulgaria – Electron properties of II-VI nanocrystalline semiconductors – 2001-2003, finished.

TEACHING COURSES:

- “Introduction in solid state physics” – summer practice for students in 07.2016.
- “AFM-Elementary introduction” – course for PhD students in May-June 2014.
- “Fundamentals of AFM” – course for additional operators of the SPM -2010.

- Teaching and supervising 5 operators in the period 2008-2012.
